EXPERIENCE

Software Developer

CSS India Pvt Ltd

Jan 2022 - Aug 2022

India

- Integrated digital stethoscope & telemedicine initiatives and digital monitoring, increasing patient access to care by 20%.
- Delivered patient-centered care to 50+ patients per week, accurately maintaining confidential records in Electronic Health Record (EHR) systems, resulting in a 20% reduction in documentation errors
- Optimized & enhanced calendar integration with Microsoft Outlook sync for automated event updates.
- Built event booking system for sports and dining reservations.
- Applied Clean Architecture with Google Components.
- Worked in Agile Scrum with designers & QA to deliver on-time releases.

Android Developer

NSL GROUP Public Ltd

Jan 2021 - Dec 2021

India

- Created interactive sales and inventory dashboards to track key business KPIs.
- Engineered live vehicle tracking and real-time inventory scheduling solutions, reducing operational costs by 60%.
- Implemented real-time inventory scheduling with automated reminders.
- Enabled graph visualizations (line, bar, pie, radar) via chart libraries.
- Analyzed delivery and usage data to optimize logistics and reduce idle time.

Android Developer

UMDAA Healthcare Pvt Ltd

July 2019 - Oct 2020

India

- Collaborated with a team of 10+ medical professionals to streamline clinical workflows, improving patient throughput by 15% while maintaining full regulatory compliance
- Supported diagnostic testing to enhance health outcomes.
- Applied strong communication, problem-solving, and adaptability in high-pressure healthcare settings.

Software Developer - Intern

MANAC Infotech (P) Ltd

Nov 2014- July 2015

India

- Built a cloud computing security project focused on data encryption and authentication across multi-cloud (J2SE & J2EE) environments.
- Implemented secure login forms with input validation and unique authentication keys to safeguard user access.
- Designed and executed a system for seamless, secure data transfer between multiple cloud storage providers.
- Addressed key challenges in protecting private and sensitive data from untrusted cloud providers.
